Product Overview

Professional Perimeter Security

This electric fence perimeter security system is engineered for long-term reliability in demanding environments. Designed with high-pressure, pollution, and corrosion resistance, it ensures consistent operation for both residential and agricultural boundary protection. The system is modular, allowing for flexible installation methods including auxiliary and floor-mounted supports tailored to your site's specific enclosure conditions.

System Components

Included Hardware

- Terminal rod
- Load-bearing rod
- Wire crossing rod
- Insulators
- Alloy fence wire
- Warning board
- Wire tightening device

Durability & Build

Key Resistance Features

High pressure resistance, Pollution resistance, Oxidation resistance, Corrosion resistance

Service & Support

Ordering & Service

Service Type	Details
OEM Capability	Supported
Customization	Logo/Design printing available
Sample Availability	Available (Freight/Fee applies)
Standard Delivery	Within 1 week for finished goods

Minimum Order Quantity	One carton
