

Electric Foot Spa Massager with Heat and Vibration

This electric foot spa massager features a contoured basin with integrated massage rollers and nodes. It includes adjustable temperature settings, a splash guard, and a vibration function.

Overview

Therapeutic Foot Massage Experience

The Electric Foot Spa Massager is engineered to provide a relaxing and therapeutic experience, utilizing a combination of bubble, vibration, and warming functions. Featuring a contoured basin with integrated massage rollers and nodes, it effectively targets key pressure points on the soles of the feet. Designed for convenience and durability, it includes a splash guard to prevent spills and is constructed from easy-to-clean, high-quality plastic.
