Product Overview

Efficient Electric Material Handling

This sitting full electric stacker is engineered to significantly reduce operator work intensity through ergonomic design and intuitive controls. Featuring a durable, high-capacity traction battery and a powerful DC motor, it delivers excellent speed regulation and torque for both driving and lifting. Its compact structure, combined with a robust C-type steel door frame, ensures both maneuverability and high-level operational security.

Performance & Power

Drive & Lift System	Superpower DC motor with speed regulation
Battery Technology	Durable large capacity traction battery
Charging	Convenient and rapid charging

Design & Ergonomics

Operator Interface	Human-engineered handle with integrated controls
Frame Construction	C-type forming steel door frame
Design Style	Compact, Steady, Sitting Type

Safety & Features

Safety Features

- Overhead guard
- Safety lights
- Horn
- Seatbelt
- Mirrors

Visibility	Yes
