

Electric Four-Wheel Rollator with Powered Assistance

This electric rollator is a mobility aid designed to provide enhanced stability and assistance. It features a four-wheel design with suspension, a comfortable seat, armrests, a front basket, and safety features like lights and mirrors.

Overview

Enhanced Mobility Solution

This electric four-wheel rollator is designed to provide enhanced stability and powered assistance for individuals with limited mobility. Featuring a robust steel and PVC frame, it offers a reliable mobility aid for navigating various terrains with ease. The integrated 200W motor and long-range battery ensure users can travel confidently, while the inclusion of a seat and storage basket adds practical convenience for daily use.
