

Electric Fuel Pump Module for VW

This electric fuel pump module is designed for automotive applications, specifically VW vehicles. The module ensures reliable fuel delivery to the engine.

Product Overview

High-Performance Fuel Delivery Module

This electric fuel pump module is precision-engineered to meet stringent automotive standards for reliable engine performance. Each unit undergoes rigorous testing to ensure durability and consistent fuel delivery under various operating conditions. Designed specifically for VW applications, it provides a seamless fit and optimal flow rates.

Technical Specifications

Part Numbers

- EFM0000412
- EFP433701G

Operating Pressure	3.5 Bar
Flow Rate	110 L/h
Application	VW
Cross Reference	BOSCH: 0 580 453 012

Quality & Certifications

Quality Assurance

100% Tested • Precision Manufactured

Certifications	TUV, ISO/TS 16949:2002, CE
