

Electric Grinding Pulverizer

This electric grinding pulverizer features a fashionable appearance and reasonable structure design. It has a movable inner cup, which allows for convenient cleaning.

Product Overview

Professional Electric Grinding Pulverizer

The SP-7400 electric grinding pulverizer is a compact, high-efficiency appliance designed for consistent grinding performance. Featuring a durable stainless steel blade and a transparent cover for real-time monitoring, it is ideal for processing dry ingredients such as spices, coffee beans, and nuts. This unit combines a powerful motor with a user-friendly push-button operation and safety-focused design.
