

Electric Horizontal Log Splitter

This horizontal log splitter is designed for efficient wood splitting. It features a robust hydraulic system capable of generating significant splitting force.

Product Overview

Efficient Wood Splitting Solution

The LS5T-52E is a high-performance horizontal log splitter engineered for efficient wood processing. Designed for both residential and light commercial applications, this electrically powered unit offers quiet and environmentally friendly operation. Its robust hydraulic system delivers consistent splitting force, while the compact, wheeled design ensures easy transport and storage.
