

Electric Hot Water Dispenser

Electric hot water dispenser quickly boils water and maintains a constant temperature. Its double stainless steel wall construction provides insulation and prevents scalding.

Product Overview

Professional Electric Water Boiler

This stainless steel electric water dispenser is engineered for high-volume commercial environments, providing reliable hot water on demand. It features intuitive controls for heating and keep-warm functions, ensuring efficiency during peak service hours. The integrated water level indicator allows for quick monitoring, making it an essential appliance for offices, catering services, and hospitality settings.

Technical Specifications

Controls

- On/Off Switch
- Heating Indicator
- Keep Warm Indicator

Material	Stainless Steel
Key Features	Heating Function, Keep Warm Function, Water Level Indicator, Dispensing Tap

Usage

Application

Commercial Use • High-Volume
