

Electric Household Fan for Air Circulation

This electric fan is designed for household use, providing air circulation and ventilation. The fan is identified by model number BH-1601D.

Product Overview

Efficient Air Circulation

The BH-1601D electric household fan is engineered to provide consistent and effective air circulation for residential environments. Designed with a focus on ventilation performance, this unit helps maintain comfortable air quality throughout living spaces. Its robust construction ensures reliability for daily use, making it an essential addition to any home climate control setup.

Technical Specifications

Usage Environment

Household • Indoor

Model Number	BH-1601D
Product Category	Electric Household Fan
Primary Function	Air Circulation, Ventilation
