

Electric Household Rice Cooker with Non-Stick Pot

This electric rice cooker is designed for household use. It features a non-stick inner pot and a control panel for selecting cooking modes.

Product Overview

Designed for Consistent Quality

This electric household rice cooker is engineered to provide perfectly cooked rice through precise temperature maintenance. Featuring a durable, heat-resistant outer body and an intuitive control panel, it offers both safety and ease of use. The high-quality non-stick inner pot simplifies the cleaning process, making it an essential appliance for everyday kitchen convenience.

Technical Details

Cooking Capabilities

- Non-stick inner pot coating
- Consistent temperature maintenance
- Steam vent for moisture control

Safety Certifications

Heat-resistant exterior, Steam venting system

Control Interface

Integrated digital control panel for mode selection and setting adjustments
