

Electric Impact Wrench

This electric impact wrench is designed for heavy-duty fastening applications. It features a high-torque motor for efficient performance and a durable construction for long-lasting use.

Overview

Heavy-Duty Electric Impact Wrench

This high-torque electric impact wrench is engineered for demanding fastening applications in automotive repair, construction, and industrial maintenance. Designed with a durable construction and an ergonomic handle, it ensures reliable performance while minimizing user fatigue during extended operation. The tool features variable speed control and a robust motor, making it an essential asset for precise and efficient heavy-duty tasks.

Technical Specifications

Compatible Sleeve Sizes

- M17
- M18
- M19
- M20
- M21
- M22

Rated Power	450 W
Maximum Torque	320 Nm
No-load Speed	3600 RPM
Power Supply	230V, 50Hz
Output Shaft Diameter	1/2"
