

Electric Juice Extractor

This electric juice extractor is designed for home use. It efficiently separates juice from pulp to provide fresh and healthy beverages.

Overview

Efficient Juicing Performance

This electric juice extractor is designed for high-efficiency operation, utilizing a robust 450W motor to maximize juice yield from fruits and vegetables. Featuring a specialized twice-juicing structure and a durable stainless steel grater and filter, it ensures consistent results with every use. The design prioritizes user convenience and safety, incorporating separate collection cups for juice and pulp, along with a built-in safety micro-switch for worry-free operation.

Technical Specifications

Power Rating	450 W
Noise Level	Low noise design

Features

Key Components

- Stainless steel grater
- Stainless steel filter
- Separate juice cup
- Separate pulp cup

Safety Features	Safety micro-switch, On/off switch
