Product Overview

Modern Electric Kettle

This modern electric kettle combines aesthetic appeal with high-performance functionality. Designed for efficiency, it features rapid water heating capabilities that save both time and energy. Safety is prioritized through an advanced steam induction controller that automatically shuts off power once boiling is achieved, alongside built-in dry-burn protection.

Design & Construction

Material Composition

- High-quality 304 stainless steel interior
- Durable plastic exterior

Base Design

360-degree rotational base

Safety & Performance

Heating Efficiency

Fast heating • Energy saving

Safety Features

Automatic shut-off, Dry-burn protection, Steam induction control
