

Electric Kettle - 1.7 Litre Capacity

This electric kettle is designed for quickly boiling water. It features a concealed heating element for efficient heating and a water level indicator with markings for minimum and maximum fill levels.

Product Overview

Efficient Boiling Solution

This electric kettle is designed for rapid water heating, making it an essential appliance for professional kitchen environments. It features a high-capacity 1.7-litre design with a concealed heating element, ensuring both efficient performance and simplified cleaning routines. The integrated water level indicator allows for precise filling, supporting both minimum and maximum volume requirements.

Technical Specifications

Maximum Capacity	1.7 Litres
Minimum Capacity	0.8 Litres
Heating Element	Concealed
