Product Overview

High-Performance Kettle Heating Element

This 2000W electric kettle heating element is engineered for reliable and efficient performance in household kitchen appliances. Built with high-quality aluminum sheath material and OCr25Al5 resistance wire, it ensures consistent heat transfer and durability. The unit is designed for standard 230V operation, making it a robust choice for appliance repair and manufacturing.

Technical Specifications

Rated Power

2000 W
Power

230 V
Voltage

Construction Materials

Aluminum Sheath, OCr25Al5 Resistance Wire

Part Number

AHM41199

Logistics & Packaging

Packaging Specifications

Attribute	Value
Quantity per Carton	60 PCS
Carton Dimensions	580 x 340 x 180 mm
