

Electric Kettle with Auto-Shutoff

This electric kettle quickly boils water with its concealed heating element. It features a 1.7-liter capacity, stainless steel body, and auto-shutoff for safety.

Product Overview

Efficient Water Heating Solution

This electric kettle is engineered for both home and professional office environments, offering a reliable solution for rapid water boiling. Built with a durable stainless steel body, it combines longevity with a modern aesthetic suitable for any breakroom or kitchen. The integrated safety features, including an automatic shut-off mechanism, ensure peace of mind by preventing damage from dry boiling.

Technical Specifications

Capacity	1.7 L
Voltage/Frequency	120V / 60Hz
Heating Element	Concealed

Features

Key Features

- Auto-shutoff safety function
- Removable filter
- Stainless steel construction
- Dry-boil protection

Applications	Home Use, Office Use
