

Electric Kettle with Automatic Shut-Off

This electric kettle is designed for rapid boiling. It features an automatic shut-off function for safety and a removable filter for easy cleaning.

Product Overview

Professional Electric Kettle

This stainless steel electric kettle is engineered for efficiency and safety in both home and office environments. Featuring a concealed heating element, it ensures rapid boiling times while maintaining a sleek, professional aesthetic. The inclusion of an automatic shut-off function and a removable filter provides both operational safety and ease of maintenance for daily use.
