

Electric Kettle with Seamless Interior

This electric kettle features a no-welding-point inner pot for easy cleaning. It offers double-layer insulation and a rapid boil function.

Product Overview

Seamless Design for Professional Use

This electric kettle is engineered with a seamless 304 stainless steel interior, ensuring hygiene and simplifying the cleaning process. The double-layer insulation design provides enhanced safety, effectively protecting users from burns during operation. It combines rapid boiling capabilities with robust safety features, making it an ideal choice for efficient and secure water heating.
