

Electric Kettle with Stainless Steel Body

This electric kettle is made with a durable stainless steel body for long-lasting use. It features a concealed heating element and automatic shut-off for safe and efficient boiling.

Product Overview

Efficient Stainless Steel Kettle

This durable 1.7L stainless steel electric kettle is designed for reliable performance in professional environments. Featuring a concealed heating element and automatic dry boil protection, it ensures both longevity and user safety. With its 360-degree rotation base and elegant illumination light, it offers a seamless blend of convenience and modern aesthetics for any setting.

Technical Specifications

Power Performance

2200 W

Max Power Output

Capacity	1.7 L
Voltage Compatibility	220-240V, 100-120V

Safety & Design

Safety Features

- Dry boil protection
- Automatic shut-off upon boiling
- Concealed stainless steel heating element

Design Details

360-degree rotation • Cord storage • Illumination light
