

# Electric Log Splitter with 7-Ton Splitting Force

This electric log splitter is designed for home use. It features a hydraulic system that delivers a splitting force of 7 tons and can handle logs up to 520mm long and 250mm in diameter.

## Product Overview

### Efficient Log Splitting Solution

This electric log splitter is designed for safe and efficient firewood preparation in home environments. Featuring a powerful hydraulic system, it delivers a robust 7-ton splitting force to handle logs with ease. The unit is equipped with integrated wheels for convenient transportation and utilizes a two-hand safety operation system to ensure user protection during operation.
