

Electric Material Mixer

This robust electric mixer is designed for mixing paints, mortars, adhesives and other construction materials. It features variable speed control and an ergonomic handle for comfortable operation.

Overview

Professional Material Mixing Solution

The Electric Material Mixer is a robust and powerful tool engineered for efficient mixing of paints, mortars, adhesives, and various construction materials. It features a high-torque motor for consistent performance and variable speed control to match specific material requirements. Designed for comfort and durability, this mixer minimizes fatigue and ensures a homogenous blend for both professional and DIY applications.

Performance

Motor Type	High-torque
Speed Control	Variable speed control

Features

Key Design Benefits

- Ergonomic handle for reduced fatigue
- Optimal paddle design for homogenous mixing
- Durable construction for job site reliability
- Minimized air entrapment

Suitable Applications	Paint, Mortar, Adhesives, Construction Materials
-----------------------	--

Usage

Target User

Professional • DIY
