Product Overview

Professional Electric Metal Shear

This electric metal shear is engineered for efficient and precise metal sheet fabrication. It is capable of smoothly cutting general steel plates up to 2.3mm thick, delivering a clean, burr-free edge without sparking. Designed for longevity and ease of maintenance, the cutting blades can be machined and renewed for extended service life.

Technical Specifications

Max Cutting Thickness

2.3 mm
Steel Plate

Performance Features

Burr-free edge, Spark-free operation, Renewable blades

Design & Build

Design Highlights

- Robust motor for industrial applications
- Ergonomic handle for stability
- Specialized cutting head for accuracy
- Durable construction
