

Electric Mixer for Paint and Mortar

This high-performance electric mixer is designed for demanding mixing applications. It features a powerful motor, variable speed control, and dual mixing paddles for efficient and thorough mixing of various materials such as paint, mortar, and adhesives.

Product Overview

Professional Mixing Solution

This high-performance electric mixer is engineered for the demanding requirements of construction and industrial applications. It features a robust motor and variable speed control, allowing for precise consistency when mixing paint, mortar, and adhesives. The ergonomic handle design enhances user comfort, minimizing fatigue during extended professional use.

Technical Specifications

Performance Highlights

2 pcs
Mixing Paddles

Compatible Materials

Paint, Mortar, Adhesives

Key Features

Core Attributes

- Powerful motor for high-torque applications
- Variable speed control for material-specific mixing
- Dual paddle system for thorough consistency
- Ergonomic handle design for reduced fatigue
- Durable construction for professional environments
