

Electric Moka Coffee Pot with Magnetic Milk Frother

This appliance combines a magnetic milk frother with an electric Moka coffee pot. The integrated milk frother uses magnetic induction to create rich, creamy frothed milk for lattes and cappuccinos.

Product Overview

Versatile 2-in-1 Coffee Solution

This innovative appliance combines a classic electric Moka coffee pot with a magnetic milk frother, sharing a single convenient power base. Designed for efficiency and ease of use, it allows for seamless preparation of coffee and frothed milk beverages like lattes and cappuccinos. With a 240ml capacity for warming and a 115ml capacity for frothing, it is an ideal addition to any home or office coffee station.
