

Electric Multi-Function Oven with Digital Controls

This electric oven features LED computer control and intelligent operation for various cooking modes. It boasts a stainless steel exterior and interior, with upper and lower stainless steel blue light tubes for far-infrared baking.

Overview

Professional Electric Multi-Function Oven

This high-end electric oven features advanced LED computer controls for intelligent, automated cooking across a wide variety of modes, including roasting, baking, and defrosting. Built with a durable stainless steel exterior and interior, it offers superior cleaning ease and a luxurious aesthetic suitable for professional kitchen environments. With precise temperature control, hot air circulation, and specialized accessories like a rotisserie and roasting cage, this oven delivers consistent, high-quality results for meats, pastries, and snacks.
