

Electric Multi-Tool with Interchangeable Attachments

This versatile electric multi-tool features a rear motor design for optimal balance and control. It includes interchangeable attachments for various gardening tasks, such as trimming grass, cutting hedges, and pruning branches.

Overview

Versatile Gardening Performance

The rear motor electric multi-tool is a robust all-rounder designed for comprehensive garden maintenance. Featuring a high-performance 900W motor, this tool supports interchangeable attachments for hedge trimming, pole pruning, grass trimming, and brush cutting. With ergonomic design elements such as an adjustable shoulder strap and a 50 cm telescopic extension, it offers professional-grade comfort and reach for demanding landscaping tasks.
