Product Overview

Professional Electric Noodle Maker

This high-quality electric noodle maker is engineered for efficient and reliable performance in creating various types of fresh noodles. Built with a robust motor and gear system encased in a durable housing, it ensures consistent output for both home and commercial kitchen environments. The unit is designed for easy integration into existing setups, prioritizing ease of use and long-term maintenance.

Technical Specifications

Motor Type	Brushed DC Motor
Gearbox Construction	Die-cast aluminum
Performance Features	High Torque, Low Output Speed, Robust Design

Application

Suitable Applications

- Home kitchen use
- Commercial food preparation
- Noodle production lines
