

Electric Power Drill

This is an electric power drill designed for drilling. It provides efficient power and performance.

Overview

Professional Diamond Coring Solution

This electric power portable diamond coring drill is engineered for precision concrete drilling and hole cutting applications. Designed for heavy-duty performance, it offers the portability required for on-site construction tasks while maintaining the power necessary for efficient core extraction. It serves as an essential tool for professionals requiring clean, accurate holes in reinforced concrete and masonry structures.

Technical Specifications

Tool Type

Portable • Diamond Coring Drill

Power Source

Electric

Primary Application

Concrete Drilling, Core Cutting, Masonry
