

Electric Power Steering Column Assembly

This steering column assembly is equipped with an electric power steering (EPS) motor. It features a metallic steering gear housing, a black-painted steering shaft, and a mounting bracket for secure attachment to the vehicle chassis.

Product Overview

Precision Steering Enhancement

This electric power steering column assembly is engineered to provide superior steering precision and significantly reduce driver effort. Featuring a robust construction with an integrated EPS motor, the unit ensures responsive handling in modern automotive applications. Its design includes secure chassis mounting and reliable electrical connections for seamless vehicle integration.

Technical Details

Materials

- Metallic steering gear housing
- Black-painted steering shaft
- Integrated EPS motor

Key Features

Electric Power Steering • Integrated EPS Motor • Chassis Mounting Bracket • Direct-Mount Electronics

Part Identification

2003-5032-1002, 0001032000
