

Electric Powered Wheelbarrow

This electric wheelbarrow is designed for efficient material handling. It features a durable frame, high-capacity tub, and a powerful electric motor.

Product Overview

Efficiency in Heavy Hauling

This electric-powered wheelbarrow is engineered to streamline heavy-duty material transport in construction, landscaping, and gardening environments. Featuring a robust steel frame and a high-capacity polypropylene tub, it combines durability with operational efficiency. The integrated variable speed electric motor and front-wheel drive system ensure smooth, maneuverable transport across various terrains, significantly reducing operator fatigue.

Performance & Power

Power Source

Battery Powered • Electric Motor

Drive System

Front wheel drive

Speed Control

Variable speed control

Construction & Design

Ergonomic Features

- Ergonomic handles
- Balanced design for reduced fatigue

Frame Material

Steel

Tub Material

Polypropylene

Applications

Suitable For

Construction, Landscaping, Gardening
