

Electric Ride-On Floor Sweeper

This electric sweeper is designed for efficient cleaning of large areas. Its adjustable brushes, powerful electric motor, and large-capacity hopper provide effective sweeping for both indoor and outdoor use.

Overview

Efficient Cleaning Solution

The NJ-D1600A is an electric ride-on sweeper engineered for the efficient cleaning of large commercial and industrial spaces. Its compact design allows for excellent maneuverability, while the powerful electric motor ensures effective debris collection across various surface types. With a zero-emission powertrain and low-maintenance construction, this sweeper is an ideal choice for both indoor and outdoor professional cleaning applications.

Key Performance

Power Source

Electric • Emission-Free

Suitable Environments

Indoor, Outdoor, Commercial, Industrial

Technical Features

Operational Features
