

Electric Sightseeing Vehicle with Cargo Box

This electric sightseeing vehicle offers efficient and eco-friendly transportation. It features a durable chassis, comfortable seating, and a rear cargo box for added utility.

Overview

Eco-Friendly Utility Transportation

This electric sightseeing vehicle is designed for efficient, quiet, and eco-friendly transportation in recreational environments. Featuring a durable chassis and comfortable seating, it balances passenger capacity with practical utility thanks to an integrated rear cargo box. It is an ideal solution for resorts, parks, and large campuses requiring reliable, low-emission mobility.

Key Features

Key Benefits

- Electric powertrain for quiet operation
- Reduced emissions for eco-conscious environments
- Integrated rear cargo box for added utility
- Transparent windshield for enhanced safety and visibility
- Rugged tires suitable for various surfaces

Ideal Applications

Resorts, Parks, Recreational Areas, Campuses
