

Electric Sightseeing Vehicle

This electric vehicle is designed with the newest technology. It offers quiet and emission-free operation for a comfortable and environmentally responsible experience.

Overview

Versatile Electric Transportation

This Electric Sightseeing Vehicle is a robust and eco-friendly transportation solution designed for resorts, tourism, and gated communities. It features a durable welded steel chassis and a reinforced plastic body, ensuring longevity and reliability in various environments. With a quiet, emission-free electric motor and a smooth suspension system, it provides a comfortable experience for passengers while maintaining low operational costs.

Performance & Powertrain

Motor Power	2.87 kw
Speed Range	18-24 km/h
Load Capacity	360 kg

Electrical System

Battery Configuration	Six 6V deep cycle storage batteries (225amp)
Charger Output	25amp DC output at 36V

Dimensions

Dimensions (L*W*H)	2.68m * 1.18m * 1.85m
Turning Clearance Diameter	5.72 m
Weight (without batteries)	265 kg

Technical Details

Chassis Construction	Welded high yield strength tubular steel
Suspension	Heavy duty multiple leaf springs with hydraulic shock absorbers
Braking System	Self-adjusting, dual rear wheel mechanical drum brakes

Logistics

Container Capacity

Container Type	Capacity
20' Container	12 units
40' HQ Container	28 units
