

Electric Space Heater with Grille Guard

This is a space heater designed to provide warmth in indoor environments. The appliance has a circular heating element protected by a metal grille and includes a control switch.

Overview

Compact Electric Heating Solution

This electric space heater is engineered for efficient localized warmth in indoor environments. Featuring a robust metal grille guard for enhanced safety, the unit is designed with a stable yellow base for secure placement. Its compact form factor makes it an ideal choice for professional or personal spaces requiring supplemental heating.
