

# Electric Space Heater

This electric space heater is designed for household use. It features a circular heating element protected by a metal grill and a plastic frame, with a rotary control knob for adjusting heat settings.

## Product Overview

### Efficient Localized Heating Solution

This electric space heater is engineered for effective localized warming in indoor environments. Featuring a robust circular heating element encased in a durable protective metal grill, it ensures both safety and consistent heat distribution. The integrated rotary control knob provides simple, intuitive adjustment of heating levels to suit individual comfort preferences.

## Technical Specifications

### Design & Construction

- Circular heating element
- Protective metal grill
- Durable plastic frame
- Rotary base control knob

### Ideal Usage

Indoor use, Localized heating, Residential
