

Electric Steakhouse Grill

This electric grill reaches temperatures of 850 degrees for fast searing. It cooks food in three minutes, delivering delicious results quickly.

Overview

Professional Steakhouse Performance

This high-performance electric grill is engineered to deliver steakhouse-quality searing results. Capable of reaching temperatures up to 850°C, it cooks food significantly faster than a standard electric oven, allowing you to enjoy delicious meals in as little as 3 minutes. Its durable stainless steel construction and user-friendly features make it an ideal solution for achieving the perfect crust on steaks, poultry, and vegetables.
