Product Overview

Precision Tea Brewing

This electric tea brewing machine offers professional-grade precision with variable temperature control and adjustable infusion settings. Designed for versatility, it accommodates delicate green teas and robust black teas with ease. The integrated 24-hour timer and automated keep-warm functions ensure that a perfect cup is ready exactly when needed, making it an ideal appliance for home or office environments.

Technical Specifications

Voltage	230V
Frequency	50Hz
Power Consumption	1100 W

Capacity and Design

Water Tank Capacity	1 L
---------------------	-----

Operational Controls

Temperature Range	60°C to 100°C
Infusion Time Settings	2 to 16 minutes
Timer Capabilities	24-Hour Programmable, Adjustable Keep Warm, Automatic Switch-off (180 min)

Safety and Monitoring

Safety Protections

- Patented overheat protection
- LCD display for real-time boiler temperature monitoring
