

Electric Tricycle with Open Cabin

This electric tricycle has a red frame and an open cabin design with a windshield. It is designed with three wheels for stability, making it suitable for urban transportation and recreation.

Product Overview

Eco-Friendly Urban Mobility

This electric tricycle features an open cabin design with a protective windshield, combining comfort with stability. Designed for urban transportation and recreational use, it offers a sustainable and efficient alternative to traditional motorized vehicles. The three-wheel configuration ensures enhanced balance and ease of handling for various riding environments.
