

Electric Vehicle Recovery Winch

This electric winch is designed for vehicle recovery and heavy-duty pulling tasks. It features a high-torque motor and durable steel cable, ensuring reliable performance in harsh conditions.

Overview

Professional Vehicle Recovery Solution

This high-performance electric winch is engineered for heavy-duty recovery operations and demanding pulling tasks. It features a robust, weather-resistant construction equipped with a high-torque motor and a durable steel cable system. Designed for both reliability and safety, the unit includes convenient remote operation and integrated roller fairleads to ensure smooth performance in harsh conditions.

Technical Specifications

Rated Pulling Capacity

5000 lbs

Pulling Capacity

Cable System

- Durable high-strength steel cable
- Integrated roller fairlead for reduced friction
- Secure-attachment recovery hook

Control and Operation

Control Method

Remote Control, Electric

Construction

Design Features

High-Torque Motor • Heavy-Duty Construction • Weather-Resistant • Easy Installation
