

Electric Water Circulation Pump

This water pump is designed for various applications. It features a robust electric motor coupled with a durable pump housing and includes inlet and outlet ports for easy connection to plumbing systems.

Product Overview

Reliable Water Circulation Solution

This electric water circulation pump is engineered for consistent performance in fluid transfer and HVAC&R applications. Featuring a robust electric motor and a durable, high-strength housing, it is designed to withstand demanding operational environments. The unit includes standardized inlet and outlet ports, ensuring seamless integration into existing plumbing and circulation systems.

Technical Specifications

Construction

- High-strength plastic housing
- Integrated electrical motor enclosure
- Standardized inlet/outlet ports

Protection Features

Environmental Protection Enclosure • Durable Housing

Common Applications

HVAC&R, Water Circulation, Fluid Transfer
