

Electric Water Pump

This electric pump is engineered for water boosting, irrigation, and general water transfer applications. Its robust design ensures durability, optimized power consumption, and easy installation.

Product Overview

AUJET Series Performance

The AUJET Series electric pump is a high-performance solution engineered for diverse applications, ranging from water boosting and irrigation to general water transfer. Designed with a robust construction, it ensures durability and consistent operation for both residential and commercial environments. The unit features a compact, easy-to-install design that minimizes maintenance and downtime while optimizing power consumption for long-term efficiency.

Technical Specifications

Safety Features

- Overheating protection
- Damage prevention mechanisms

Operational Benefits

Robust Construction • Optimized Power Consumption • Easy Installation • Low Maintenance

Suitable Applications

Water Boosting, Irrigation, Water Transfer, Residential, Commercial
