

Electric Water Pump for Water Transfer

This electric water pump is designed for efficient water transfer and boosting. It features a robust motor and durable construction for long-lasting reliability.

Overview

High-Performance Water Transfer Solution

This electric water pump is engineered for efficient water transfer and boosting applications. Featuring a robust motor and durable construction, it is designed to deliver long-lasting reliability in demanding environments. It provides consistent water pressure and flow rates, making it an ideal choice for domestic water supply, agricultural irrigation, and various industrial processes.

Technical Specifications

Key Features

- Robust motor design
- Durable construction
- Consistent water pressure
- High-efficiency flow rate

Model	PM45
Suitable Applications	Domestic Water Supply, Irrigation, Industrial Processes, Water Boosting
