

Electric Water Transfer Pump

This water pump is designed for efficient water transfer in various applications. It features a robust electric motor and durable housing, suitable for agricultural, industrial, and domestic water pumping needs.

Overview

High-Efficiency Electric Water Transfer Pump

This durable electric water transfer pump is engineered to deliver reliable performance across agricultural, industrial, and domestic environments. Featuring a robust motor housed within a corrosion-resistant casing, it is designed for long-term operational stability. Its compact form factor and stable mounting base ensure easy integration into existing piping systems, making it a versatile solution for diverse water management needs.

Technical Specifications

Key Performance Metrics

2850 RPM

Speed

Construction Details

Corrosion-resistant housing, Electric motor, Compact design, Stable base

Application

Suitable Applications

- Agricultural irrigation
- Industrial water transfer
- Domestic water supply
