

Electric Water Transfer Pump

This electric water pump is designed for fluid transfer applications. It features multiple hose barb connections and color-coded electrical wires.

Product Overview

High-Efficiency Fluid Transfer Solution

This compact electric water pump is precision-engineered for diverse fluid transfer applications in industrial and machinery settings. Designed for reliability, it features a durable housing and versatile hose connections to ensure seamless integration into existing systems. The inclusion of color-coded wiring simplifies the installation process for professional users.

Technical Specifications

Suitable Applications

- Industrial fluid transfer
- Machinery cooling systems
- General liquid pumping

Housing Material	Durable Plastic
Installation Features	Color-coded wires, Multiple hose barbs
