

Electric Water Transfer Pump

This general-purpose water pump is designed for various applications. It features a robust electric motor coupled with a centrifugal pump housing and is constructed with durable materials for long-lasting performance, making it suitable for drainage and irrigation purposes.

Overview

Professional Water Transfer Solution

This general-purpose electric water transfer pump is engineered to deliver reliable performance for both drainage and irrigation needs. Featuring a robust electric motor and a durable centrifugal pump housing, it is built to withstand demanding operational conditions. Its versatile design makes it an ideal solution for professionals requiring consistent fluid movement across various industrial and agricultural applications.

Technical Specifications

Core Components

- Robust electric motor
- Centrifugal pump housing

Construction Status

Durable Materials • Long-lasting Performance

Applications

Drainage, Irrigation, General-purpose fluid transfer
