Overview

Versatile Industrial Lifting Solution

The CD1-Wire-Rope Electric Hoist is a compact and intelligent lifting system designed for safe, smooth, and reliable performance in demanding environments. It is highly adaptable, capable of operating on straight or curved overhead tracks and compatible with single beam, bridge, suspension, cantilever, and gantry cranes. By optimizing material handling processes, it significantly enhances efficiency and improves working conditions in factories, mines, harbors, and warehouses.

Technical Specifications

Motor Construction

- Full copper wire windings
- High-temperature resistance
- Efficient heat dissipation
- Extended wire coil for enhanced lifespan

Safety Equipment

- High-grade alloy steel hook
- Anti-collision hook protection
- High-quality insulated switch
- Wireless remote control compatibility

Operating Voltage

220 V

Housing Material

A3 Steel

Certifications

Certifications & Standards

CE, GS, TUV, Rheinland
