

Electric Wire Rope Hoist

This electric wire rope hoist features a compact, light, and small-sized design, ensuring smooth operation. It can be used on overhead rails and in conjunction with single-girder, double-girder, cantilever, and gantry cranes.

Product Overview

Electric Wire Rope Hoist Series

The CD1 and MD1 electric wire rope hoists are designed for compact, efficient lifting operations in industrial settings. Featuring a lightweight, small-sized shape and smooth operation, these units are versatile enough for overhead rails, single-girder, double-girder, cantilever, and gantry cranes. The MD1 model offers dual lifting speeds for precision adjustments, while the CD1 provides reliable single-speed performance.

Technical Specifications

Drive Type	Electric
Lifting Block Type	Lifting Block
