

Electric Wood Router with 8/12mm Collet

This electric router is designed for woodworking applications. It features an 8/12mm collet for versatile bit compatibility and a robust motor.

Product Overview

High-Precision Electric Wood Router

This robust electric wood router is engineered for high-precision woodworking applications, offering versatility for shaping, trimming, and creating decorative edges. Featuring an adjustable depth setting and a dual-capacity 8/12mm collet, it accommodates a wide range of router bits for diverse project requirements. Designed with ergonomic handles for sustained comfort, this tool provides the reliability and power needed for efficient material removal across various wood types.

Technical Specifications

Depth Adjustment Range

0.2 mm

Minimum Increment

8 mm

Maximum Depth

Key Features

- High-precision depth control
- Dual-size collet compatibility
- Ergonomic handle design
- Robust motor for efficient cutting

Collet Size

8mm, 12mm

Applications

Primary Applications

Shaping • Trimming • Edge Decoration • Woodworking
