

Electric Yogurt Maker for Home Use

This electric yogurt maker is designed for creating homemade yogurt. Its compact design features a temperature-controlled environment, ensuring optimal conditions for yogurt fermentation.

Product Overview

Natural Yogurt Made at Home

This electric yogurt maker provides a reliable and simple way to produce fresh, natural yogurt in your own kitchen. Featuring an automatic thermostatic PTC heater, the device ensures precise temperature control for consistent fermentation results. Its compact, user-friendly design allows you to easily place a milk carton directly into the machine, making the process of creating healthy, preservative-free yogurt effortless and convenient.

Performance Specifications

Power Consumption	15 W
Capacity	0.9 L
Heater Technology	Automatic thermostatic PTC heater

Technical Details

Dimensions

120 mm Width	120 mm Depth	216 mm Height
------------------------	------------------------	-------------------------

Voltage/Frequency	AC 220-240V 50/60Hz
-------------------	---------------------

Features

Key Features

- Power indicator light
- Precise temperature control
- Transparent lid for monitoring
- Easy to clean and operate
