

Electric Yogurt Maker with Individual Cups

This electric yogurt maker allows for the easy preparation of homemade yogurt. It includes six individual cups and features precise timer control.

Product Overview

Professional Electric Yogurt Maker

This versatile yogurt maker offers a professional solution for creating fresh, homemade yogurt with ease. Featuring a precise digital control system and microprocessor, it ensures consistent fermentation to maintain the activity of lactobacillus cultures. Its unique structure promotes 360-degree heat circulation, while the transparent lid allows for real-time monitoring of the cooking process.

Technical Specifications

Power Performance

20 W Rated Power	1000 ml Total Capacity
----------------------------	----------------------------------

Input Voltage	220V-240V 50Hz
